Req_ID	Test_Case ID	Test_Case_Description	Test_Steps	Test_Data	Expected_Result	Actual_Result	Status
Req_1.1	TC_01	Verify User should be able to log in using a registered mobile number and valid password.	Given the customer is on the Login page with an active account. When the customer enters registered mobile number 9876543210 and password Rahul@123 and clicks Login . Then the customer is authenticated successfully.	Mobile: 9876543210Password: Rahul@123	User should be logged in successfully and redirected to the Dashboard with a success message.	User logged in successfully and redirected to the Dashboard.	Passed
Req_1.2	TC_02	Verify User should be able to log in using a registered Customer ID and valid password.	Given the customer has an active account. When the customer enters Customer ID CUST102345 and valid password and clicks Login . Then authentication is completed successfully.	Customer ID: CUST102345Password: Rahul@123	User should be logged in successfully and redirected to the Dashboard.	User logged in successfully and redirected to the Dashboard.	Passed
Req_1.3	TC_03	Verify User should be able to log in using a registered email ID and valid password.	Given the customer has an active account. When the customer enters registered email ID and valid password. Then login is successful.	Email: raghu.astepahead@gmail.com Password: Rahul@123	User should be logged in successfully and redirected to the Dashboard.	User logged in successfully and redirected to the Dashboard.	Passed
Req_1.4	TC_04	Verify User should be able to log in using a valid MPIN.	Given the customer has configured an MPIN. When the customer enters the registered mobile number and valid MPIN. Then login is successful.	Mobile: 9876543210MPIN:1234	User should be logged in successfully using the MPIN.	User logged in successfully using the MPIN.	Passed
Req_1.5	TC_05	Verify User should be able to authenticate	Given OTP authentication is enabled. When the customer enters the correct	OTP:654321	User should be redirected to the Dashboard after	OTP verified successfully and user redirected to the Dashboard.	Passed
Req_1.7	TC_07	Verify User	Given the customer account	Mobile:9876543210Password:R	Error message	Error message "Incorrect	Passed
Req_1.8	TC_08	Verify User should not be able to log in using an invalid Customer ID.	Given the customer is on the Login page. When an invalid Customer ID is entered. Then login is rejected.	Customer ID:CUST999999Password:Rahul@123	Error message " Invalid Mobile Number or Customer ID. " should be displayed.	Error message "Invalid Mobile Number or Customer ID." displayed.	Passed

Req_1.11	TC_11	Verify User should not be authenticated using an expired OTP.	Given OTP validity has expired. When the customer enters the expired OTP. Then OTP verification fails.	OTP:654321 (Expired)	Error message " Invalid or Expired OTP. " should be displayed.	Error message "Invalid or Expired OTP." displayed.	Passed
Req_1.12	TC_12	Verify User should receive validation messages when mandatory fields are left blank.	Given the Login page is displayed. When the customer leaves mandatory fields blank and clicks Login . Then validation is triggered.	Blank Mobile NumberBlank Password	Validation messages should be displayed for mandatory fields.	Validation messages displayed.	Passed
Req_1.13	TC_13	Verify User account should be temporarily locked after multiple failed login attempts.	Given the account is active. When incorrect credentials are entered repeatedly until the maximum limit is reached. Then the account is locked temporarily.	Mobile:9876543210Wrong Password	Account should be temporarily locked and an appropriate message should be displayed.	Account locked temporarily and appropriate message displayed.	Passed
Req_1.14	TC_14	Verify User should not be able to log in using an inactive account.	Given the customer account is inactive. When valid credentials are entered. Then login is rejected.	Inactive Account Credentials	Error message " User account is inactive. " should be displayed.	Error message "User account is inactive." displayed.	Passed
Req_1.15	TC_15	Verify User should be able to reset the password and log in using the new password.	Given the customer has forgotten the password. When the customer resets the password successfully and logs in using the new password. Then login is successful.	Mobile:9876543210New Password:Rahul@456	Password should be reset successfully and the user should be able to log in using the new password.	Password reset successfully and user logged in using the new password.	Passed

Req. No.	Requirement Description	Test Case ID	Status
R_1.0	The system should allow customers to log in using a registered mobile number.	TC_01, TC_06	TC_01, TC_06 Passed
R_2.0	The system should allow customers to log in using a registered Customer ID.	TC_02, TC_08	TC_02, TC_08 Passed
R_3.0	The system should allow customers to log in using a registered Email ID.	TC_03, TC_09	TC_03, TC_09 Passed
R_4.0	The system should authenticate customers using a password or MPIN.	TC_01, TC_02, TC_03, TC_04, TC_07	TC_01, TC_02, TC_03, TC_04, TC_07 Passed
R_5.0	The system should verify customers using OTP when enabled.	TC_05, TC_10, TC_11	TC_05, TC_10, TC_11 Passed

R_6.0	The system should redirect authenticated customers to the Dashboard.	TC_01, TC_02, TC_03, TC_04, TC_05, TC_15	TC_01, TC_02, TC_03, TC_04, TC_05, TC_15 Passed
R_7.0	The system should lock the account after multiple failed login attempts.	TC_13	TC_13 Passed
R_8.0	The system should support the Forgot Password functionality.	TC_15	TC_15 Passed
R_9.0	The system should validate mandatory login fields.	TC_12	TC_12 Passed
R_10.0	The system should allow only active customer accounts to log in.	TC_14	TC_14 Passed
